C, C++, Java

Libraries/Frameworks

React, Django

Development

HTML, CSS, JavaScript, MernStack, Python Full Stack

Cloud/Databases

AWS, MySQL, MongoDB

Other Tools

Git

EXPERIENCE

Edu Skills Foundation, Intern

Nov 2022 – Jan 2023 | Virtual Internship

Cloud Computing, AWS Services

PROJECTS

Food Delivery App, MERN Stack ☑

Developed a full-stack food delivery website using the MERN stack, featuring user and admin modules. Users can browse, sort, and purchase food items with real-time order status updates, while admins manage products and order statuses. Showcases expertise in React and Node.js integration.

College Erp, MERN Stack ☑

Proficient in developing an Attendance System with MongoDB for streamlined data management. Skilled in creating user-friendly interfaces using React.js and Node.js for seamless faculty attendance tracking. Experienced in integrating feedback features to facilitate student insights and enhance course effectiveness.

Astrological Prediction System, Django ☑

Developed robust signup and login pages with comprehensive user data display using the Django framework in Python for full-stack web development. Implemented external page functionality for accessing astrology predictions, ensuring seamless interaction with external websites.

CERTIFICATIONS

- AWS Cloud Practioner ☑
- Red Hat Certified Enterprise Application Developer ☑
- Oracle Cloud Infrastructure 2023 Architect Associate ☑
